

## MICRODERMABRASION

Microdermabrasion is a gentle and safe non-invasive treatment that results in SMOOTH, FRESH, HEALTHY & CLEANER Skin.

It is an effective treatment for:

- Fine Lines & Wrinkles
- Pigmentation or Age Spots
- Acne & Surgical Scarring
- Open Pores
- Whiteheads & Blackheads
- Scar Tissue
- Course, Uneven, Bumpy Skin
- Sallow Complexion
- Dull, Congested or Thickened Skin
- Age Revealing Hands

Microdermabrasion delivers a safe & comfortable exfoliation, lymphatic massage & better blood circulation. It gently removes dead cells from the skin, revealing younger, fresher looking skin whilst unclogging pores & stimulating new cell growth. The Treatment is not painful & no discomfort should be experienced.

Your skin may be flushed & feel warm after the treatment. This flushing called Erythema (increase of blood flow) brings in more nutrients, vitamins & oxygen which helps to repair the skin & stimulate collagen.

To experience maximum results, a course of 6 treatments at fortnightly intervals is recommended (varies according to skin conditions). The result is amazing looking skin! The skin texture will be smoother, pores will be cleaner with congestion removed.
